**PRACTICAL FIRE STOPPING
& FIRE DOOR AWARENESS
COURSES**

**1-DAY PRACTICAL FIRE DOOR
INSTALLATION COURSE
or a
COMBINED 2-DAY FIRE STOPPING
AND FIRE DOOR COURSE.**

**Fire
Solutions &
Maintenance**

Our practical installation courses are delivered by industry experts at our purpose-built training centre in Southwark, South London.

FIRE STOPPING COURSE

● Why is it important to learn about fire stopping?

Because the pipe and cable penetrations supplying power, water etc. are mostly hidden in wall and ceiling voids, it's vital they are installed correctly, with the right products and sealed correctly. Otherwise, if there's a fire, the pipes and cables are likely to melt and cause smoke to spread throughout a building and more importantly people may die!

● What is covered in the training?

- Passive fire – what it is and risk areas to be aware of.
- Compartmentation – reducing fire spread within a building.
- Reinstatement requirements and fire ratings.
- Fire stopping products and associated manufacturers – technical support / test evidence and selecting correct products for respective penetrations.
- Best practice for site inspection, installation and maintenance surveys, certifications, guidance notes and regulations as well as Third-Party Certification Schemes.
- Practical hands-on installation training with experienced installers.

FIRE DOOR INSTALLATION COURSE

- **Why is it important to learn about fire doors?**

Fire doors are “Engineered Fire Safety Devices” that will save lives and reduce the spread of fire IF they are manufactured, installed and maintained correctly. Following a Fire Door Inspectors survey carried out by the FDIS in 2022, 75% of over 100,000 doors surveyed failed the inspection due to a lack of basic knowledge. This course will enhance your knowledge and help you to be part of the improvements within the industry.

- **What is covered in the training?**

- What is a fire door and what are the differences between a doorset and a fire door assembly – the pros & cons of each.
- Best practice for site measure, installation and maintenance.
- Practical hands-on installation training with experienced installers & Maintainers.

NEED TO KNOW

- **Who are these training courses for?**

These courses are ideal for trainee passive fire operatives, supervisors, managers, facility managers, resident liaison officers or any businesses looking to equip their staff with further passive fire knowledge

- **Do I need to be a skilled worker to benefit from the training?**

No, the day is structured to cover the needs of each learner.

- **Will I need my own tools?**

No. Tools are available within the centre. You are welcome to use your own tools if preferred.

- **How is the course delivered?**

The course is delivered by industry experts and skilled operatives at our purpose-built training centre based in Southwark.

- **Are these courses certified?**

No this course does not carry recognised certification but you will receive a certificate of achievement.

- **Is parking available?**

Yes, although spaces are limited so learners are encouraged to car share where possible.

We are a registered delivery centre of the National Open College Network (NOCN) an Ofqual regulated Awarding Organisation and licensed by the British Woodworking Federation (BWF).

As an approved NOCN training provider we are approved to deliver the SiteRight assured BWF Fire Door Installation Awareness 2-day course.
